HIVE STATUS

 Calm hive

 Calm hive	0-50	100%
 Active buzzing	50-70	0%
 Agitated	70-100	0%
 Alarm	100+	0%

AI SUGGESTIONS

- All steady

Hive is calm and steady — a healthy resting or light-foraging acoustic profile.

● Calm hive

0 events

No events yet — the hive's memory builds as it buzzes.

○

- All calm — no alerts.

Connect (server) streams data from the PC running `server.py` (serial on `COM7`) — works from a phone on the same Wi-Fi.

Connect Arduino (Serial) reads the port directly in Chrome/Edge on this PC. The Arduino must print one **amplitude** value per line at **9600** baud.

Demo mode simulates a live hive.
